WORK EXPERIENCE

360BrandStore | Enterprise Merchandise Platform (04/2024 - 11/2024)

- Built and scaled a production-grade B2B SaaS platform for enterprise merchandise procurement, gifting, and event-based distribution.
- Architected a React + TypeScript frontend with reusable components, optimized state management, secure role-based access, and cross-functional API integration.

Dashboard | Order Management System (02/2025 - 04/2025)

- Developed an enterprise Angular-based order management dashboard to automate and streamline end-to-end order flows across multiple teams and departments.
- Implemented admin tracking, status monitoring, and workflow visibility features, improving operational efficiency, coordination, and control over the order lifecycle.

360Customizer Official Website (08/2025 - Present)

- Developed the official website of 360Customizer using React, delivering a modern, high-performance brand and product experience.
- Implemented advanced UI animations, interactive sections, and responsive layouts, enhancing user engagement while maintaining performance and scalability.

GiftHub | Enterprise Gifting Tools Platform (02/2025 - Present)

- Built and owned the enterprise frontend architecture of GiftHub, enabling automated gifting decisions through modular tools and unified UX.
- Implemented scalable Redux Toolkit state management and integrated Python-based AI services and Node.js APIs across ELVA, Catalog Builder, Mockup Generator, and Bulk Enquiry.
